A SAL PILLA O'II PIAN PENGATIVE of the North American College of Health; enablished in Washington. D. C. Januard R. 1838 FOR THE CURE OF ALL DISEASE

The beautiful and simple ftheory of one disease and one remed), as practised by our manse Tudi and one removated by the North American College of Health, is beginning now to be generally under stood. Thousands who have beretofore maintain ed the necessity of a peculiar medicine for every particular disease, now as strenuously contend that as all our maiadies proceed from one cause, so one medicine, capable of reme ving that cause, will cure every disease incident to man,

If disease of the head, or the feet, or the lungs liver. Ac. each require a peculiar kind of medic te to heal them, would not those parts (ach requie a particular kind of food for their mourishment). But us we know that good, wholesome tood in urish ea all parts of the system while, it is manifest there fore that a good and proper vegetable medicine will, by purifying the blood, search out as d remote disease from every part of the tody

According to the Natural or Indian theory, all

our complaints owe their origin to one cause the shutting up of those outlets (the skin kit ners and howels) through which nature has intended that all corrept and useless matters shall be carried from the budy. When these become closed it is fable Cultry, but the country of a water cruise, either the acro for Prescrits & c, & c mulated waters find a new outlet or the country be comes innedated, just so with the human both, if mulate in the system, and either find venim ihe extends to the opening of all the natural drairs of the body. Whilst under the influence of this sirgu lar medicine the body will be kept in a gentle in effectual perspiration, a proper discharge of unit will be experienced, the stomach and howels will be thoroughly cleaned, and the blood will be store ulated to purity itself

One very common objection urged 13 some who had partially understand the principle of entire principle of the principle of th disease ty purgation, as promulgated by the Arch American College of Health is that all oughte a crited purging will cure disease; set that the re peated exercising of those organs will injure cride stroy their tone. Those who raise objections appear to forget that purging is as natural to the box els as walking is to the feet or labor to the bands. and like every other function must be duly exercis

ed in order to retain their energies. How persons can comprehend the action of vig etable purgatives; hy what my sterious processile blood is by them stimulated to deposite its impur ties into the bowels, or how those organs are excit ed to evacuate the corrupt humors from the hord, all can understand when they experience their The gentlemen who compose the North American College of Health would therefore earnestly made all who are suffering from disease of any kind to make a treat of the Indian Vegetable Pills begleave to assure the American Public that said Indian Pill are a purgative so justly balanced that they may be taken at all times and under all or cumstances with perfect safety, and no dose how tver small, but will afford some relief, and no

tver small, nut will affurth some rathel, and no quantity, however large, (if it lessed as is required to open the break), an present; t pure.

Assisting Nature should be our chief study, and forths purpose, the Mian Purgative will be found the most of fectual medicine ever offered to the public. Its powerbeing always directed to the opening of those drains, through which putters arrises out all impurities from the both. which nature carries out all impurities from the boly affords precisely the amount of assistance she requires enuble her to cure every variety of disease. It beings vegetable preparation, and acting in harmony without constitution, it is always the right moduline to be administered. A single dose will in most cases afford telefand

istered A single dose will in most cases afford telul, and if persevered with, will always effect a curs in using the Indian Purgative, (or Indian Vegetable Pills,) no care is necessary, except in taking such esshall operate freely upon the bowels. If this effect is without every other function will be duly performed. This shall not the function will be duly performed. tion of impurities, and the energy imparted he this is transdinary medicine to the blood, will enable that flud transferring mentions to the broad, will enter the underly and the bowels, from whence they will be carried off by the regular action of those organs.

One great advantage, possessed by the Indian Pilicers.

One great advantage, possessed by the finding inside every other medicine is, that is they cure disease upon natural principles and suit. Il complaints, they are always the right medicine to be administered, and, consequed ly, can never be taken improperly, therefore, no time should be lost in listening to contradictory advice the only inquiry should be, is the person sick it so, the sooser a few doses of the luding Fills are administered, the sooner will the native the restored to health and usefulness. tient be restorcy to health and usefula-Price 25 cents per box with full directions

A NATURAL REMEDY APPLICABLE TO OUR CONSTITUTION and competent to cure ere years
ble discuse, may be found in the
INDIAN PURGATIVE PILLS.

Or UNIVERSAL MEDICINF of the North America College of Health This assertion may startle the render and appear to him absurd and ridiculous, yet nevertheless it is time. What is disease? When properly considered it is only an ellor disease. When properly considered it is only an ellow of nature to expel from the body some offending causative are so constituted that there is a constant tendent in nature to expel or throw off whatsoever is injunous to health. This is done by urine, stool, sweat, experior tion, vomit, &c. These are the sewers of the body thrownich all the uncless and decayed matter is carried of unit of the property of the body thrownich all the uncless and decayed matter is carried of the body thrownich the body they are kent once. So long will the body

and so long as they are kept open, so long will the body continue in health. But when from eating improper food or other cause, the bowels become costive, or sudden transitions from lient to cold, the pores of the skin because sitions from lieut to cold, the pores of the skin became closed, or any of the other drains become obstructed, risk consequences are sure to follow. The foul matter which should escape by these autilets instead of passing of st nature intended harderend in the body, and either putifies in the stomach, or is taken up by the absorbest rescis and added to the circulation. This impure matter thating about the avatem in the blood is disease to a later. sels and added to the circulation. This impure maker fluating about the system, in the blood is disease in a latent force. It sometimes appears harmless for a while, the control of the c but nature always in the abert soon discovers the intride but nature always us the abertsoon discovers the intrucer and immediately commonces a struggle for their expulsion it will be observed that in order to accomplish this under taking she always directs her efforts to remove official matters (disease) It is not wonderful the under such of cumstances the body should sink, under the conflict. As visting nature, should be our chief study and for this popose no medicine will be found so effectual as the Indian Purposite Pulls as their efforts extended oversions of the pose no medicine will be found so effectual as the Purgative Pills, as their effects extend to every one of the nutural drains. Whilst under its influence the body will not under its influence the body will not be a property of the blood be kept in a gentle but effectual perspiration. The blood will throw aff the grosser particles of its improprigt on the bowels from which it will be expelled by the purguist quality of the Pills. And under every crieumstance of properly pursevered with, it is impossible but that every disease must yield to their powerful influence.

Thus breakly have we endasproved in addess ourselessor.

Thus briefly have we endeavored to addess ourselves to the understanding of the roader to show to him in as co-densed and courclusive a manner as possible the ground and regions why we claim Extraordinary Powers for the INDIAN PURGATIVE PILIS

-Oas story for the would perfectly a stamp upon the memory of the reader. It is universally known and so knowledged that the Indians are the most skillful in the cure of diseases, of any people by the world, and common sense teaches us that herbs which apring spanisheds from our native soil, if properly combined and applied are the hest adapted to our Constitutions. Therefore when the hest adapted to our Constitutions. Therefore when the hest adapted to our Constitutions. Therefore when the coupled with the above) we assure the reader that the INDIAN PURGATIVE PHISS are simply a compound of four simple herbs now in universal use by the North merican ladings, and we trust he is convinced of their or the couple of th perior quelities and therefore competent to the cure

every cutable disease.
